

Apricot rootstock

## **Peach seedling MONTCLAR™ Chanturgue**

Rootstock for dry sites

**Vigour:** 100%

**Origin:** INRA, France

**Characteristics:** Strong growth. In spite of that starts to yield early and with high productivity. No production of root suckers.

**Spacing:** 2,5 - 3,5 m x 4 - 5 m

**Site:** Due to the deep rooting it is especially suitable for dry and well aerated soils. Sites with high pH level (> 7,5) should be avoided because of the susceptibility to chlorosis.
