

## Apricot rootstock

### **WAVIT™ Prudom (S)**

Rootstock with reduced and very even growth

**Vigour:** 65% compared to peach seedling Montclar™ Chanturgue

**Origin:** Nursery Schreiber, Poysdorf, Austria

**Intellectual property:** Consortium Deutscher Baumschulen GmbH, Germany

**Lineage:** clone selection of Wangenheim

**Characteristics:** Rootstock with medium growth rate. The stocks are much more uniform than with the rootstock Wangenheim seedling due to the vegetative in vitro reproduction. Starts to yield early and regularly high with good fruit size. Especially suitable for vigorously growing varieties. The trees have very good lodging resistance. Root suckers barely attracted attention until now.

**Spacing:** 1,5 - 2,5 m x 3,5 - 4,5 m

**Site:** High adaptability to various soil and climate conditions. An additional irrigation might be needed on dry and poor soils. Good frost hardiness.
