

# Nectarine

**Variety:** Convoitise (S)  
**Species:** Nectarine, *Prunus nucipersica*

<b>Origin:</b>	
Breeder, Place	INRA, France
Intellectual property	CEP Innovation, France
Crossing number	NJ6925
Property rights	registered for EU plant variety rights
<b>Blossom:</b>	
Blooming date, -intensity	medium blossom period, ideal to high blossom density
Fertility	self-fertile
Flower shape	rose shape
<b>Fruit:</b>	
Ripening time	medium, 6. peach week, 5-7 days after 'Diamond Bright (S)'
Scale, shape	medium to large, rounded, moderate suture
Skin	smooth-skinned
Colour	shiny dark red to purple coloured fruits on the sunny side, shaded fruits also nearly 100 % coloured, lenticels around the fruit apex
Fruit flesh	yellow, firm and crunchy, juicy
Taste	sweet-spicy, slightly nutty, well flavoured when underripe
Stone separability	clingstone
Storage	good
<b>Tree:</b>	
Vigour	medium strong to strong, semi-upright to spreading, dark green and healthy leaf
Crop load	from an early age regular ideal to high, even spread of fruit and ripening
<b>Evaluation:</b>	Very nice yellow-fleshed nectarine with excellent taste and brilliant fruit colouring. Convoitise (S) has regular high yield with very good fruit size at the same time.
