

Nectarine

Trademark: FIRE TOP™
Variety: Zaidebi
Species: Nectarine, *Prunus nucipersica*

Origin:	
Breeder, Place	Floyd Zaiger, California, USA
Intellectual property	Artevos, Germany
Property rights	registered for EU trademark
Blossom:	
Blooming date, -intensity	medium blossom period, ideal high density
Fertility	self-fertile
Flower shape	rose shape
Frost susceptibility	low susceptibility of flower buds to winter frost
Fruit:	
Ripening time	medium, 8. peach week
Scale, shape	medium large, rounded, slightly oblong, limited suture, deep stalk cavity
Skin	smooth
Colour	nearly 100 % shiny dark red to purple over colour
Fruit flesh	intense yellow, slightly reddish around the stone, firm and juicy
Taste	spicy-aromatic with ideal acidity
Stone separability	partial freestone
Storage	good
Tree:	
Vigour	medium strong, semi-upright, good even branching
Crop load	ideal to high, thorough fruit-thinning is necessary
Evaluation:	FIRE TOP™ Zaidebi is a delicious yellow-fleshed, mid-season ripening nectarine. The regular crop load and very good fruit staining are characteristic for this variety.
