Species: Peach, *Prunus persica*

| | |
|---------------------------|---|
| Origin: | |
| Breeder, Place | Floyd Zaiger, California, USA |
| Intellectual property | Artevos, Germany |
| Property rights | registered for EU plant variety rights and trademark |
| Blossom: | |
| Blooming date, -intensity | medium blossom period, very high and regular density, prolonged blossom |
| Fertility | self-fertile |
| Flower shape | rose shaped, attractive dark pink blossom |
| Frost susceptibility | low susceptibility |
| Fruit: | |
| Ripening time | late, 12. peach week |
| Scale, shape | medium to large, rounded with a limited suture |
| Skin | nearly smooth-skinned |
| Colour | > 90 % shiny, dark red over colour, fruit colours well in the shade |
| Fruit flesh | white, distinct redness around the stone, melting, very juicy |
| Taste | very sweet and aromatic |
| Stone separability | freestone |
| Storage | good |
| Tree: | |
| Vigour | medium strong, semi-upright to spreading, compact, healthy and dark green foliage |
| Crop load | from an early age regular and ideal to high |
| Evaluation: | Late-ripening, white-fleshed peach with a high yield potential and very good leaf to fruit ratio. This delicious variety is well recognised for its particularly healthy tree including the dark green foliage. |
