Blossom:	
Blooming date, -intensity	medium blossom period, ideal density
Fertility	self-fertile
Flower shape	rose shape
Frost susceptibility	under examination
Fruit:	
Ripening time	early, 3. peach week, 40-45 days before 'SWEET CAP™ Maillarflat (S)'
Scale, shape	large flat peach
Skin	slightly woolly skin
Colour	nearly 100 % luminous crimson over colour, fruit colours well in the shade
Fruit flesh	white, good firmness with fine flesh, juicy
Taste	aromatic-sweet, exceptional taste
Storage	good
Tree:	
Vigour	medium strong, semi-upright, good branching
Crop load	ideal
Evaluation:	Early ripening flat peach with a high production potential and symmetrically even, large fruits. Because of the flat fruit shape and sweet taste it is especially popular as a snack for children. Our first testing results confirm the evaluation of the breeder. A minimum order of 25 trees per fruit grower is required!
