

Peach

Variety: Pajeny (S)
Species: Peach, *Prunus persica*

Origin:	
Breeder, Place	AC Fruit, France
Intellectual property	STAR FRUITS ®, France
Property rights	registered for EU plant variety rights
Blossom:	
Blooming date, -intensity	medium, medium high blossom density
Fertility	self-fertile
Flower shape	rose shape
Frost susceptibility	low
Fruit:	
Ripening time	very early to early, 1. - 2. peach week
Scale, shape	medium large to large, more or less round, a bit flat shaped, very limited suture, deep stalk cavity
Skin	undisturbing, smooth skinned
Colour	nearly 100 % dark red to crimson coloured, a bit marbeled
Fruit flesh	yellow with red filament, tender melting at full maturity, very juicy
Taste	at the first pick mild taste with fine acidity, high ripe very intense peach flavour
Stone separability	stone tends to stick to the flesh
Storage	good
Tree:	
Vigour	medium strong to strong, semi upright to spread, good branching, dark green and healthy leaves
Crop load	medium productivity
Evaluation:	Early ripening, yellow fleshed peach with good internal and external fruit qualities. The attractive shape and colour as well as the smooth skin characterise Pajeny (S).
