

Peach

Trademark: ROYAL MAJESTIC™

Variety: Zaimajal (S)

Species: Peach, *Prunus persica*

Origin:	
Breeder, Place	Floyd Zaiger, California, USA
Intellectual property	Artevos, Germany
Property rights	registered for EU plant variety rights and trademark
Blossom:	
Blooming date, -intensity	late to very late blossom period, medium to ideal density
Fertility	self-fertile
Flower shape	rose shape
Frost susceptibility	medium
Fruit:	
Ripening time	medium early, 3.-4. peach week, 10-12 days before 'Redhaven'
Scale, shape	large to very large, rounded, slightly oblong, limited suture, deep stalk cavity
Skin	nearly smooth-skinned, easily removable when fully ripe
Colour	100 % dark red to crimson over colour, marbled on shaded side
Fruit flesh	intense yellow, slightly reddish around the stone, finely textured, juicy
Taste	highly aromatic, spicy
Stone separability	partial freestone
Storage	good, the flavour is maintained well as the acidity in the fruit dissipates
Tree:	
Vigour	medium strong with dominant central leader
Crop load	medium to ideal, regular
Evaluation:	Highly recommendable yellow-fleshed, mid-season peach, that stands out because of its smooth skin, well coloured, large fruits and exceptional taste. The fruits also colour well in the shade with almost 100 % crimson over colour. The susceptibility to winter frost is low. Because of the deep stalk cavity this variety has a tendency to rupture during picking when fully ripe.
