

Peach

Variety: Sanguine
Species: Peach, *Prunus persica*

Origin:	
Breeder, Place	France
Property rights	free variety
Blossom:	
Blooming date, -intensity	medium blossom period, medium to ideal density
Fertility	self-fertile
Flower shape	rose shape
Frost susceptibility	low to medium
Fruit:	
Ripening time	medium late, 10.-11. peach week, the first red-fleshed variety of the season
Scale, shape	medium to large, rounded
Skin	moderate woolly skin, firm
Colour	100 % purple over colour
Fruit flesh	red-fleshed, firm, at high maturity melting, juicy
Taste	sourish, slightly bitter with reminiscences of wine
Stone separability	freestone
Storage	good, travels well
Tree:	
Vigour	medium strong, semi-upright
Crop load	medium to ideal productivity
Evaluation:	Large, late ripening peach which can be used for dessert fruit as well as processing. The red vineyard peach is especially good for direct on farm sales and restaurants, because of its versatile use.
