

Peach/ nectarine rootstock

Peach seedling RUBIRA™

Rootstock for dry sites

Vigour: 100%

Origin: INRA, France

Characteristics: Strong growth. In spite of that starts to yield early with high productivity. The leaf-out is delayed compared to other rootstocks. No production of root suckers.

Spacing: 2,5 - 3 m x 3,5 - 5 m

Site: Due to the deep rooting it is especially suitable for dry and well aerated soils. Sites with high pH level should be avoided because of the susceptibility to chlorosis.
