

# Plum

## Variety:

**Jubileum**

Species:

Plum, *Prunus domestica*

<b>Origin:</b>	
Breeder, Place	Balsgard, Sweden
Parents	Giant x Yakima
Property rights	free variety
<b>Blossom:</b>	
Blooming date	early
Fertility	self-fertile, pollination is beneficial
<b>Fruit:</b>	
Ripening time	medium, 7.-8. plum week
Scale, shape	very large, 50-55 mm, 80-100 g, ellipsoid
Colour	50 % purple reddish over colour, slightly speckled
Fruit flesh	golden, finely textured, very juicy
Taste	at full maturity spicy with balanced acidity, slightly sourish and firm skin
Cracking sensitivity	low to medium
Stone separability	freestone
Storage	around 2 weeks in the cold storage possible
<b>Tree:</b>	
Vigour	medium to strong, tendency to blind wood, poor branching in the nursery
Crop load	high and regular production
<b>Evaluation:</b>	The very large, attractive and well flavoured fruits have a high market value, especially in direct marketing. Uneven ripening necessitates at least 2-3 picks.
